

Ladies and Gentlemen,

our new communication center is finished and available for training courses, workshops or house fairs. On two floors it offers the possibility of holding informative meetings inclusive catering. Gladly we invite you to make use of the new building together with your technical designers, technicians or mechanics. Possible training course topics could be:

- Basics of the Franke principle with antifriction bearings and linear systems
- Franke antifriction bearing - from the bearing element to the customized bearing assembly
- Franke antifriction bearing - construction possibilities and application examples
- Franke linear systems - individual rail profiles and cassettes
- Technical Workshop for the assembly and adjustment of antifriction bearings and linear systems
- Energy efficiency - Franke components help to save energy

Alternatively we offer to accomplish such meetings with you locally. Gladly we discuss further details with you for the planning and execution of the meeting.

With best regards

Franke GmbH
